

Join our creative and dynamic, international team in **Germany** as a:

Backend Developer (m/f/x)

Use your talents at our Backend to keep our fast-moving, international business at the top of its game. You'll benefit from the winning combination of your expertise and the knowledge of a great team of designers and developers.

Who we are

- A global leader in premium online dating.
- Founded in 2004 and consistently profitable since 2011 and growing over 25% per year
- We have multiple premium products in 40 countries and expanding
- We are a team of over 150 people from 40 different nations. We're based in Munich but remote working works for us, too!
- We have a flat hierarchy and focus on getting the right things done together
-

Your role

- Take command of our backend systems, ensuring robust and scalable server-side solutions
- Contribute to the backend design and participate in choosing the best tech for our business goals
- Own the technology (Java, Spring, Gradle, MongoDB, Elasticsearch, Docker) and suggest improvements to the existing stack
- Collaborate with cross-functional teams (Frontend, Product, QA etc.) to ensure cohesive development and timely deliveries
- Participate in code reviews, performance testing and architecture discussions
- Build modular, reusable components and features by writing and reviewing high-performance code

What we offer

- The right environment to try new things, learn and grow
- Competitive remuneration package
- Remote (within Germany)
- Our brand-new Munich Hub for office days
- The security of a successful global company
- A fun team and great events
- Your choice of computer (MacBook Pro or PC laptops) and smartphone
- Opportunity to grow into specialized roles as you advance your career

Your background

- 2+ years of experience in Java-based Backend development with a focus on building scalable, reliable systems
- Solid experience developing RESTful web services using HTTP/REST/JSON and integrating with NoSQL databases (MongoDB is a plus)
- Previous focus on performance, optimization, scalability and quality in backend systems
- Strong written and spoken English
- Proven ability to work both independently and in a collaborative team environment
- Strong written and spoken English
